

Digital Check Executive to Speak at Inaugural Remote Deposit Capture Summit

--John Gainer to discuss implementation of electronic check scanners--

Northfield, Ill., April 23, 2008 – Digital Check, a leading provider of [desktop check scanners](#) for the [remote deposit capture](#) and branch automation industry, announced John Gainer, executive vice president at Digital Check, is participating in a panel at the first annual Remote Deposit Capture (RDC) Summit co-sponsored by BAI and RemoteDepositCapture.com. The panel is entitled, “Implementation Focus: Check Scanners,” and will be on Monday, April 28 at 4:00 p.m. The RDC Summit takes place on April 28 and 29 at the Gaylord National Resort and Convention Center in National Harbor, Md./Washington D.C.

The panel focuses on the importance of selecting a check scanner with expanded image scanning technology and transmission to effectively implement remote deposit capture. The panel will explore the importance of check scanners as a key element to the RDC solution. The discussion will cover the various check scanners on the market and their options, as well as explore future models and features in development. Attendees will learn how to select the right scanner for their organization based on cost, functionality and image quality.

“Choosing a reliable check scanner for remote deposit capture is essential to the implementation of remote deposit capture,” said Gainer. “There are factors that must be carefully considered that impact the total cost of ownership of the RDC solution, especially image quality, MICR accuracy and the reliability of the device. I am looking forward to contributing my experience and insight to the panel and hope to educate attendees on best practices for selecting a check scanner.”

The first ever RDC Summit is sponsored by BAI and RemoteDepositCapture.com, and is open to corporations, financial institutions and solution providers involved in payments and remittance processing. The summit provides expert sessions and panels, as well as the opportunity to network with peers regarding the current state of RDC and what the future holds for the industry.

Digital Check will be introducing CheXpress™, an innovative new check scanner designed for the small business distributed check capture market. The device provides high quality image capture capabilities and has a number of enhancements for support of small business banking customers using remote deposit capture services.

About Digital Check

Digital Check is a leading manufacturer of distributed capture check scanners for branch automation and remote deposit capture applications. Digital Check’s TellerScan® series of electronic scanners provide the highest quality images, MICR accuracy, reliability, and lowest cost of ownership within the industry. It was the first company to introduce a desktop distributed capture device for the Check 21 industry,

first to deploy at a teller window in a top 10 U.S. bank and the only U.S.-based manufacturer. The company's scanners are available worldwide through a network of more than 70 Authorized Solutions Providers and are supported by Digital Check's comprehensive fulfillment, training, support, warranty and repair services.
